

Professional Summary:

- ❖ Over one year of IT experience in Database Design, Development, Implementation and Support using various Database technologies (SQL Server 2008/2012, 2016 T - SQL) in both OLTP, OLAP and data warehousing environments.
- ❖ Expertise in SQL Server and T-SQL (DDL, DML and DCL) in constructing Tables, Joins, Indexed views, Indexes, Complex Stored procedures, Triggers, and useful functions to facilitate efficient data manipulation and consistent data storage according to the business rules
- ❖ Strong technical knowledge in SQL Server BI suite (ETL, Reporting, Analytics, Dashboards) using SSIS, SSAS, SSRS and various 3rd party tools
- ❖ Primary Point of Contact to communicate with all the necessary stakeholders for requirement gathering and transforming the same into definitive tasks.
- ❖ Well versed in designing data models using both Star and Snowflake Schema.
- ❖ Experience in Monitoring and Tuning **SQL Server Performance**
- ❖ Experience in Data modelling, Database design, normalization techniques using Database diagrams, Erwin, and other Data modeling tools
- ❖ Expert in creating, debugging, configuring, and deploying ETL packages designed MS SQL Server Integration Services (SSIS)
- ❖ Designed functional specs for BI front end applications including dash boards and reporting, considering appropriate data flow and capture
- ❖ Worked closely with the Data Architecture team and provides technical design recommendations on the data mart structures which support analytical applications
- ❖ Worked with business users and other stakeholders to understand business processes, and translates them into functional and non-functional specifications for BI solutions
- ❖ Identified problem trends and corrective actions and documenting these through modification of existing best practices guidelines
- ❖ Experience in configuration of report server and report manager for job scheduling, giving permissions to different level of users in SQL Server Reporting Services (SSRS)
- ❖ Experience in creating OLAP Data marts using SQL Server Analysis Server (SSAS)
- ❖ Experience in developing cubes using Partitions, KPI's, and Perspectives, slow moving dimensions.

- ❖ Responsible for creating Requirements Documentation for various projects
- ❖ Strong analytical skills, proven ability to work well in a multi-disciplined team environment, and adept at learning new tools and processes with ease
- ❖ Expert in designing ETL data flows using SSIS. Creating jobs and schedules for SSIS Packages, Microsoft Business Intelligence (MSBI)
- ❖ Expertise in Creating/scheduling the SQL jobs/calling them through SQL Server Agent.
- ❖ Experience in Reporting tools SSRS, and Power BI.
- ❖ Experience in Data Analytics with Advance Excel, SQL, and SSAS.
- ❖ Experience in Data Validation and Data Stewardship with Mapping and matching data.
- ❖ Experience in writing code in Python for data loads, extracts, statistical analysis

Technical skills:

GIT	Pyspark	Python
Advanced Excel	Macros	C#
PostgreSQL	Power BI	MS SQL SSRS, SSIS
SQL Server		Predictive Analytics

Professional Experience

Role: SQL Developer / BI Developer

Client: CIBC, Toronto, ON

Duration: Jan 2026 – Present

Responsibilities:

- ❖ Worked with Business Users and Business analysts in gathering requirements and preparing the functional and technical documentation.
- ❖ Developed complex T-SQL code such as Stored Procedures, functions, triggers, Indexes, and views for the application.
- ❖ Used Temporary tables, table variables in Stored procedures to simplify complex queries
- ❖ Experience in building and architecting multiple Data pipelines, end to end ETL and ELT process for Data ingestion
- ❖ Written complex SQLs using joins, sub queries and correlated sub queries. Expertise in SQL Queries for cross verification of data.

- ❖ Employed best practices in creating a complete schema including tables, relationships, stored procedures, views, clustered and non-clustered indexes, and triggers, and implemented the import and export of data using SSIS.
- ❖ Created ETL packages that reads Product, Vendor, and Order data from an FTP server into a SQL Server database. The solution also validated incoming Data and performs notifications when jobs complete.
- ❖ Created SSIS packages to load data from Heterogeneous sources like Flat files, CSV files and Excel.
- ❖ Implemented custom logging to keep track of the packages being run automatically. Configured the packages to run on different servers using Package Configurations.
- ❖ Created packages in SSIS with error handling using Event handlers.
- ❖ Experience in fact dimensional modeling (Star schema, Snowflake schema), transactional modeling and SCD (Slowly changing dimension)
- ❖ Develop and deploy SSIS packages, configuration files, and schedules job to run the packages to generate data in CSV files and scheduled SSIS packages using SQL Server Agent, Jams.
- ❖ Created SSIS packages to clean and load data to data warehouse.
- ❖ Created SSIS package to transfer data between OLTP and OLAP databases using Incremental Load.
- ❖ Created SSIS Packages using Fuzzy Lookup, Derived Columns, Pivot Transformation, Condition Split, Term extraction, Aggregate, Execute SQL Task, Data Flow Task, and Execute Package Task etc. to generate underlying data for the reports and to export cleaned data from Excel Spreadsheets, Text file, MS Access and CSV files to data warehouse.
- ❖ Individually authored, installed, deployed and managed reports using SSRS 2017.
- ❖ Generated drill through, drill down which projected data as per the user requirements using SSRS.
- ❖ Implemented Conditional formatting using Expressions in SSRS 2017.
- ❖ Created Parameterized reports using Text and Stored procedures as source in SSRS 2017.
- ❖ Deployed SSRS reports to share point server and used Excel services in Share point application.

EDUCATION:

Bachelors in Computer Science at Carleton University, Ottawa.
